

## **Cleaning and Disinfecting**

To ensure the safety and health of the children in our care, please ensure all toys and surfaces are disinfected after every service. Anywhere Spray can be used on all toys and Clorox Wipes are best for surfaces.

Seasonal deep cleanings are recommended.

If Kids Staff are made aware of a child who visited one of our locations and was treated for a contagious and/or serious illness (Example: Lice, Flu, etc.), appropriate steps will be taken to disinfect on a greater scale.
